Request for Information No. 1

February 26, 2018

Project: San Fernando Road Street Improvements Between West City Limits and S Huntington Street CDBG Project No. 601882-17, Job No. 7599, Plan No. P-724

1. Can you confirm that the material as described in the attachments is acceptable for crackfilling on the subject project?

   Yes, the material is acceptable (Please see Attachment)
PRODUCT: HPS (No Track Tack)  
CODE No: 13828  
DATE: July 19, 2016  
Purchaser: 
Destination: 
Transporter: 
Truck & Trailer No: 
Bill of Lading No: 
Contract No: 
Job No: 
Purchase Order No: 
Quantity, Lbs: 

Meets Specifications: Alon Asphalt Company

MATERIAL SAFETY DATA SHEET
Paramount Petroleum Asphalt Cements

SECTION 1 - PRODUCT AND COMPANY IDENTIFICATION

SUPPLIER/MANUFACTURER'S NAME: PARAMOUNT PETROLEUM CORPORATION
ADDRESS: 14700 Downey Ave., Paramount, CA 90723 USA
EMERGENCY PHONE: TOLL-FREE in USA/Canada 800-424-9300 Chemtrec
BUSINESS PHONE: 562-748-4711 (Product Information)
WEB SITE: www.paramountasphalt.com
DATE OF PREPARATION: June 7, 2013
DATE OF LAST REVISION: September 1, 2011

SECTION 2 - HAZARDS IDENTIFICATION

EMERGENCY OVERVIEW: This product is a black semi-solid with a mild odor.

HEALTH HAZARDS: Exposure to this product can be irritating to eyes, respiratory system and skin. Heated material can cause thermal burns. Heated material may liberate hydrogen sulfide. Long-term exposure to high concentrations of asphalt fumes may cause chronic bronchitis and pneumonitis.

FLAMMABILITY: This product is not classified as a flammable or combustible material. Flashpoint: (COC) 450°F (232°C) Min.

ENVIRONMENTAL EFFECTS: The Environmental effects of this product have not been investigated. This material is not expected to be toxic to aquatic organisms.

US DOT SYMBOLS

CANADA (WHMIS) SYMBOLS

EUROPEAN and (GHS) Hazard Symbols

Signal Word: Warning!

EU LABELING AND CLASSIFICATION:
Classification of the substance or mixture according to Regulation (EC) No1272/2008 Annex 1
EC# 231-977-3 Index# 016-001-00-4
EC# 232-490-9 This substance is not classified in the Annex I of Directive 67/548/EEC

GHS Hazard Classification(s):
Acute Toxicity Inhalation Category 4

Hazard Statement(s):
H319: Causes serious eye irritation
H315: Causes skin irritation
H332: Harmful if inhaled
H335: May cause respiratory irritation

Hazard Symbol(s):
[Xn] Harmful

Risk Phrases:
R26: Very toxic by inhalation
R36/37/38: Irritating to eyes, respiratory system and skin

Precautionary Statement(s):
P290: Do not breathe dust/fume/gas/mist/vapors/spray
P264: Wash hands thoroughly after handling
P271: Use only in well ventilated area.
P290: Wear protective gloves/protective clothing/eye protection/face protection

Safety Phrases:
S24/25: Avoid contact with skin and eyes
S36: Wear suitable protective clothing
S37/39: Wear suitable gloves and eye/face protection
S45: In case of accident or if you feel unwell, seek medical advice immediately.
MATERIAL SAFETY DATA SHEET
Paramount Petroleum Asphalt Cements

HEALTH HAZARDS OR RISKS FROM EXPOSURE:

ACUTE:
EYE: Contact may cause mild irritation including stinging, watering and redness. Contact with heated material may cause thermal burns. Vapors or fumes may cause watering of the eyes.

SKIN: Contact may cause mild to moderate skin irritation. Prolonged or repeated contact may worsen irritation by causing drying and cracking of the skin leading to dermatitis (inflammation). Long-term skin exposure can increase sensitivity to the sun and cause discoloration. Contact with the heated material may cause thermal burns. Fumes from heated material can also cause irritation. No harmful effects from skin absorption are expected.

INHALATION: Breathing vapors or fumes from the hot material may cause headaches, dizziness and lung irritation. Heated material may liberate hydrogen sulfide. This material contains sulfur compounds which may form hydrogen sulfide. Hydrogen sulfide has a strong rotten-egg odor. However, with continued exposure and at high levels, H2S may deaden a person's sense of smell. If the rotten egg odor is no longer noticeable, it may not necessarily mean that exposure has stopped. At low levels, hydrogen sulfide causes irritation of the eyes, nose and throat. Higher levels can cause headache, dizziness, nausea and vomiting, as well as coughing and difficulty breathing. Higher levels can cause shock, convulsions, coma and death. After serious exposure, symptoms usually begin immediately.

INGESTION: Ingestion may cause irritation of the digestive tract, nausea, vomiting and diarrhea.

CHRONIC: Breathing vapors or fumes from the hot material may cause headaches, dizziness and lung irritation. Long-term exposure to high concentrations of asphalt fumes may cause chronic bronchitis and pneumonitis (inflammation of the lungs).

TARGET ORGANS: ACUTE: Eye, Respiratory System, Skin CHRONIC: Respiratory System

Balance of other ingredients are non-hazardous or less than 1% in concentration (or 0.1% for carcinogens, reproductive toxins, or respiratory sensizers).

NOTE: Crumb rubber may contain various amounts of the following: Naphthenic/Aromatic Extender Oil 64742-02-7, Carbon Black 1333-86-4, Talc 64742-02-7, Zinc oxide 1314-13-2, or Sulphur 77704-34-9. Because this is derived from recycled tires and varied sources the actual percentages will vary.

ALL WHMS required information is included in appropriate sections based on the ANSI Z400.1-2004 format. This product has been classified in accordance with the hazard criteria of the CPR and the MSDS contains all the information required by the CPR, EU Directives and the Japanese Industrial Standard JIS Z 7250: 2000.

SECTION 4 - FIRST-AID MEASURES

Contaminated individuals of chemical exposure must be taken for medical attention if any adverse effect occurs. Rescuers should be taken for medical attention, if necessary. Take copy of label, bill of lading and/or MSDS to health professional with contaminated individual.

EYE CONTACT: If irritation or redness develops from exposure to fumes, move victim away from exposure and into fresh air. Flush eyes with clean water. If irritation or redness persists, seek medical attention. For contact with the molten
MATERIAL SAFETY DATA SHEET
Paramount Petroleum Asphalt Cements

material, gently open eyelids and flush affected eye(s) with cold, not icy, water. Seek immediate medical attention.

SKIN CONTACT: For contact with hot asphalt, leave material on skin and flush or immerse affected area(s) using cold, not icy water for up to 10 minutes. DO NOT remove asphalt from skin, as underlying tissue may easily be torn away. Contaminated clothing may be removed provided it is not adhering to the skin. Keep injury cool to minimize swelling and tissue damage. Be alert for signs of shock from trauma, and hypothermia from excessive cooling of the injury. Seek immediate medical attention.

INHALATION: If respiratory symptoms develop from exposure to fumes, move victim away from source of exposure and into fresh air. If symptoms persist, seek medical attention. If victim is not breathing, clear airway and immediately begin artificial respiration. If breathing difficulties develop, oxygen should be administered by qualified personnel. Seek immediate medical attention.

INGESTION: First aid is not normally required for the solid material; however, if hot asphalt is swallowed, seek immediate medical attention.

MEDICAL CONDITIONS AGGRAVATED BY EXPOSURE: Pre-existing skin, or eye problems may be aggravated by prolonged contact.

RECOMMENDATIONS TO PHYSICIANS: Once it has cooled, adhered asphalt is not harmful to the skin and in fact provides a sterile cover over the affected area. The asphalt will detach itself, usually after a few days as healing occurs. If it is necessary to remove the asphalt, only medically approved solvents or warm peraftin should be used to prevent further skin damage. If heated, this material may liberate hydrogen sulfide. In high doses hydrogen sulfide may produce pulmonary edema, respiratory depression, or respiratory paralysis. The first priority in treatment should be the establishment of adequate ventilation and the administration of 100% oxygen. If unresponsive to supportive care, nitrates may be an effective antidote.

SECTION 5 - FIRE-FIGHTING MEASURES

FLASH POINT: (COC) 450°F (232°C) Min.
AUTOIGNITION TEMPERATURE: 700°F (392°C) Approx.
FLAMMABLE LIMITS (in air by volume, %): Lower (LEL): NA Upper (UEL): NA
OSHA FLAMMABILITY CLASS: Not classified as a flammable or combustible material

FIRE EXTINGUISHING MATERIALS: Dry chemical, carbon dioxide or foam is recommended. DO NOT use a water stream. Water stream may cause violent eruptions and spreading of asphalt. Further application of water may lead to boil over. Water fog may be used on flat surfaces such as roads. Carbon dioxide can displace oxygen. Use caution when applying carbon dioxide in confined spaces.

UNUSUAL FIRE AND EXPLOSION HAZARDS: This material may burn, but will not ignite readily. Flammable and toxic hydrogen sulfide may form in closed tank headspaces. Flammability of headspace vapors containing hydrogen sulfide will differ appreciably from the values given for asphalt. Hot asphalt may ignite flammable mixtures on contact. If water is applied to heated asphalt, it can cause violent foaming and boil over.

Explosion Sensitivity to Static Discharge: Not Sensitive

SPECIAL FIRE-FIGHTING PROCEDURES: Incipient fire responders should wear eye protection. Structural firefighters must wear Self-Contained Breathing Apparatus and full protective equipment. Isolate materials not yet involved in the fire and protect personnel. Move containers from fire area if this can be done without risk; otherwise, cool with carefully applied water spray. If possible, prevent runoff water from entering storm drains, bodies of water, or other environmentally sensitive areas.
MATERIAL SAFETY DATA SHEET

Paramount Petroleum Asphalt Cements

NFPA RATING SYSTEM

Health 1 0

Reactivity

Other

Hazard Scale: 0 = Minimal 1 = Slight 2 = Moderate 3 = Serious 4 = Severe * = Chronic hazard

 SECTION 6 - ACCIDENTAL RELEASE MEASURES

SPILLS: This material may burn, but will not ignite readily. Keep all sources of ignition away from spill/release. Stay upwind and away from spill/release. Notify persons downwind of spill/release, isolate immediate hazard area and keep unauthorized personnel out. Stop spill/release if it can be done with minimal risk. Wear appropriate protective equipment including respiratory protection as conditions warrant (see Section 8). Prevent spilled material from entering sewers, storm drains, other unauthorized treatment drainage systems, and natural waterways. Dike far ahead of spill for later recovery or disposal. Allow spilled material to solidify prior to cleanup and removal. Notify fire authorities and appropriate federal, state, and local agencies. Cleanup under expert supervision is advised. If spill of any amount is made into or upon navigable waters, the contiguous zone, or adjoining shorelines, notify the National Response Center (phone number 800-424-8802).

Dispose of in accordance with applicable Federal, State, and local procedures (see Section 13, Disposal Considerations).

 SECTION 7 - HANDLING and STORAGE

WORK PRACTICES AND HYGIENE PRACTICES: As with all chemicals, avoid getting this product ON YOU or IN YOU. Wash thoroughly after handling this product. Do not eat, drink, smoke, or apply cosmetics while handling this product. Avoid breathing vapors/mists generated by this product. Use in a well-ventilated location. Remove contaminated clothing immediately.

STORAGE AND HANDLING PRACTICES: This material is typically stored, transported and used at temperatures between 275°F (135°C) and 360°F (183°C). Do not use or store near heat, sparks, or open flames. Use or store only in a well-ventilated area. Keep container closed when material is not in use.

Toxic quantities of hydrogen sulfide (H2S) may be present in storage tanks and bulk transport vessels which contain or have contained this material. Persons opening or entering these compartments should first determine if H2S is present. See Exposure Controls/Personal Protection, Section 8. Do not attempt rescue of a person overexposed to H2S without wearing approved supplied-air or self-contained breathing equipment. If there is a potential for exceeding PEL, monitoring of hydrogen sulfide levels is required. Since the sense of smell cannot be relied upon to detect the presence of H2S, the concentration should be measured by the use of fixed or portable devices.

DO NOT ADD OR ALLOW WATER TO MIX WITH HOT ASPHALT. Steam generated eruptions may occur. STORE AND TRANSPORT ASPHALT ONLY IN PROPERLY VENTED CONTAINERS. Combustion of asphalt and asphalt vapors may occur. DO NOT MISHANDLE ASPHALT EQUIPMENT. Observe manufacturer’s guidelines on proper equipment use.

An ignition source should be considered present in large tanks where asphalt is stored at temperatures above 350°F (176.7°C). Deposits can form in the vapor space of large asphalt tanks which may ignite as low as 350°F. Pyrophoric iron sulfide, commonly present in such tanks, may cause ignition below 350°F.

HANDLING: Do not enter confined spaces such as tanks or pits without following proper entry procedures such as ASTM D-4276 and 29CFR 1910.146. The use of appropriate respiratory protection is advised when concentrations...
MATERIAL SAFETY DATA SHEET
Paramount Petroleum Asphalt Cements

 exceed any established exposure limits (see Section 2 and 8).

“Empty” containers retain residue and may be dangerous. Do not pressurize, cut, weld, braze, solder, drill, grind, or expose such containers to heat, flame, sparks, or other sources of ignition. They may explode and cause injury or death. Containers should be disposed of in an environmentally safe manner and in accordance with governmental regulations.

Before working on or in tanks, which contain or have contained this material, refer to OSHA regulations, ANSI Z49.1 and other references pertaining to cleaning, repairing, welding, or other contemplated operations.

STORAGE: Minimize air intrusion into the headspace of tanks, especially when approaching flash point temperature. See API publication 2023. Keep container(s) tightly closed. In a tank, barge, or other closed container, the vapor space above this material may contain hydrogen sulfide (H2S) in concentrations immediately dangerous to life and health (IDLH). Use and store this material in cool, dry, well-ventilated areas away from all sources of ignition. Post area “No Smoking or Open Flame.”

Hot asphalt must never be added to a tank or other container that is not completely dry. Contact with water results in violent expansion as the water turns to steam. This can lead to dangerous boil over and may cause damage or rupture of the tank or container. Keep away from any incompatible material (see Section 10).

SECTION 8: EXPOSURE CONTROLS - PERSONAL PROTECTION

EXPOSURE LIMITS/GUIDELINES:

<table>
<thead>
<tr>
<th>Chemical Name</th>
<th>CAS#</th>
<th>ACGIH TWA</th>
<th>OSHA TWA</th>
<th>NIOSH</th>
</tr>
</thead>
<tbody>
<tr>
<td>Asphalt</td>
<td>8052-42-4</td>
<td>0.5 mg/m³ TWA</td>
<td>Not Listed</td>
<td>0.5 mg/m³</td>
</tr>
<tr>
<td>Hydrogen Sulfide</td>
<td>7783-06-4</td>
<td>1 ppm TWA</td>
<td>20 ppm Ceiling</td>
<td>10 ppm</td>
</tr>
</tbody>
</table>

Note: The ACGIH TLV is 0.5 mg/m³ as the benzene extractable portion of the inhalable fraction of asphalt fume. The TLV may also be determined by unspecified “equivalent” methods.

Currently, International exposure limits are not established for the components of this product. Please check with competent authority in each country for the most recent limits in place.

VENTILATION AND ENGINEERING CONTROLS: Use with adequate ventilation to ensure exposure levels are maintained below the limits provided above. Use local exhaust ventilation to control airborne vapor. Ensure eyewash/safety shower stations are available near areas where this product is used.

The following information on appropriate Personal Protective Equipment is provided to assist employers in complying with OSHA regulations found in 29 CFR Subpart I (beginning at 1910.132) or equivalent standard of Canada, or standards of EU member states (including EN 149 for respiratory PPE, and EN 166 for face/eye protection), and those of Japan. Please reference applicable regulations and standards for relevant details.

RESPIRATORY PROTECTION: Maintain airborne contaminant concentrations below guidelines listed above, if applicable. If necessary, use only respiratory protection authorized in the U.S. Federal OSHA Respiratory Protection Standard (29 CFR 1910.134), equivalent U.S. State standards, Canadian CSA Standard Z94.4-93, the European Standard EN149, or EU member states.

EYE PROTECTION: Safety glasses or chemical goggles as appropriate to prevent eye contact. If necessary, refer to U.S. OSHA 29 CFR 1910.133 or appropriate Canadian Standards.

HAND PROTECTION: Use chemical resistant gloves to prevent skin contact. If necessary, refer to U.S. OSHA 29 CFR 1910.138 or appropriate Standards of Canada.

BODY PROTECTION: Use body protection appropriate to prevent contact (e.g. lab coat, overalls). If necessary, refer to appropriate Standards of Canada, or appropriate Standards of the EU, Australian Standards, or relevant Japanese Standards.

SECTION 9: PHYSICAL and CHEMICAL PROPERTIES

PHYSICAL STATE: Semi-solid at ambient temperature, viscous liquid at heated storage and handling temperature.

SECTION 10 - STABILITY and REACTIVITY

STABILITY: Product is stable
DECOMPOSITION PRODUCTS: Heating this material may produce hydrogen sulfide.
MATERIALS WITH WHICH SUBSTANCE IS INCOMPATIBLE: May react with strong oxidizing agents, such as
chlorates, nitrates, peroxides, etc.
HAZARDOUS POLYMERIZATION: Will not occur.
CONDITIONS TO AVOID: Contact with incompatible materials.

SECTION 11 - TOXICOLOGICAL INFORMATION

TOXICITY DATA: Toxicity data is not available for mixture:

CAS# 8052-42-4
Acute Oral Toxicity LD50 5,001 mg/kg Rat
Acute Dermal Toxicity LD50 2,001 mg/kg Rat

SUSPECTED CANCER AGENT: This product may contain an ingredient(s) that is found on one or more of the following
lists: FEDERAL OSHA Z LIST, NTP, CAL/OSHA, IARC and therefore is considered to be, or suspected to be a
cancer-causing agent by these agencies.
IRRITANCY OF PRODUCT: Contact with this product can be irritating to exposed skin, eyes and respiratory system.
SENSITIZATION OF PRODUCT: This product is not considered a sensitizer.
REPRODUCTIVE TOXICITY INFORMATION: No information concerning the effects of this product and its components
on the human reproductive system.
CARCINOGENICITY NOTE: Skin application of asphalt fume condensate fractions caused skin tumors in laboratory
mice. Animal studies in which high concentrations of asphalt fumes were breathed for extended periods of time did not
cause carcinogenic effects.
There is no evidence presented by the National Toxicology Program (NTP) or the Occupational Safety and Health
Administration (OSHA) to establish Asphalt as a carcinogen (cancer causing compound). After a review of the
research, the International Agency for Research on Cancer (IARC) concluded there is inadequate evidence that bitumens
(asphalt) alone are carcinogenic in humans; that there is limited evidence to suggest that asphalt alone is carcinogenic
to humans.
Occupational Exposure: Data released by the National Institute of Occupational Safety and Health (NIOSH) suggests
paving and roofing asphalt fumes and asphalt paint fumes are a potential carcinogen to individuals who have long term
exposure to high concentrations of fumes, as might be expected from workers in the paving and roofing industries. The
data is based on animal and human studies and have not been validated as conclusive by other studies or research
organizations.
Exposure to the Community or to responders, if any, is infrequent, and at concentrations and durations significantly
below levels of exposure that might be experienced by paving and roofing workers. Asphalt odors occur at levels
significantly below levels needed to produce harmful health effects.
ALL WORK PRACTICES MUST BE AIMED AT ELIMINATING ENVIRONMENTAL CONTAMINATION.

ENVIRONMENTAL STABILITY: This material is not expected to have a significant adverse effect on the environment.

EFFECT OF MATERIAL ON PLANTS or ANIMALS: No evidence is currently available on this product’s effects on plants or animals.

EFFECT OF CHEMICAL ON AQUATIC LIFE: No evidence is currently available on this product’s effects on aquatic life.

PREPARING WASTES FOR DISPOSAL: Waste disposal must be in accordance with appropriate Federal, State, and local regulations, those of Canada, Australia, EU Member States and Japan.

This material, if discarded as produced, is not a RCRA “listed” hazardous waste. However, it should be fully characterized for toxicity and possible reactivity prior to disposal (40 CFR 261). Use resulting in chemical or physical change or contamination may subject it to regulation as a hazardous waste. Along with properly characterizing all waste materials, consult state and local regulation regarding the proper disposal of this material.

Container contents should be completely used and containers should be emptied prior to discard. Container rinsate could be considered a RCRA hazardous waste and must be disposed of with care and in full compliance with federal, state and local regulations. Larger empty containers, such as drums, should be returned to the distributor.

US DOT; IATA; IMO; ADR:

THIS PRODUCT IS NOT HAZARDOUS AS DEFINED BY 49 CFR 172.101 BY THE U.S. DEPARTMENT OF TRANSPORTATION.

PROPER SHIPPING NAME: Elevated temperature liquid, N.O.S. (Asphalt)

HAZARD CLASS NUMBER and DESCRIPTION: 9 (Miscellaneous Hazardous Material)

UN IDENTIFICATION NUMBER: UN3257

PACKING GROUP: PG III.

DOT LABEL(S) REQUIRED: White square on point marking with "HOT" and "3257." (not required for ambient temperature non-bulk shipments)
