These are new public health recommendations for fully vaccinated people. They are based on guidance issued by the Centers for Disease Control and Prevention (CDC). They will be updated over time as we learn more about the impact of vaccination on the spread of COVID-19.

### What does it mean to be fully vaccinated?

#### You are considered fully vaccinated when:

- Two weeks or more have passed since you received your second dose in a 2-dose vaccine series (Pfizer-BioNTech or Moderna); or
- Two weeks or more have passed since you received your dose of a single-dose vaccine (Johnson & Johnson/Janssen)

# People Who Are Fully Vaccinated Can:

- Visit indoors with a small number of other fully vaccinated people without wearing a mask or physically distancing;
- Visit indoors with unvaccinated people from one other household without wearing masks or physical
  distancing, <u>unless</u> any of those people or anyone they live with has an increased risk for severe illness
  from COVID-19;
- Travel, provided they take precautions described in the <u>LA County travel advisory</u>;
- Refrain from quarantine and testing if they have been exposed to a person with COVID-19 and they do
  not have symptoms.

## People Who Are Fully Vaccinated Should Continue to:

- Take steps to protect themselves and others by wearing a mask, staying at least 6 feet apart from others, and avoiding crowds and poorly ventilated spaces. These precautions should be taken whenever they are:
  - o In public
  - Gathering with unvaccinated people from more than one other household
  - Visiting with an unvaccinated person who is at increased risk for severe COVID-19 disease or who
    lives with a person at increased risk.
- Avoid medium- and large-sized in-person gatherings
- Watch out for symptoms of COVID-19, especially if after contact with someone who is sick. If they have symptoms of COVID-19, they should get tested and stay home and away from others.
