

## I-5 NORTH COUNTY ENHANCEMENTS PROJECT

### Weldon Canyon Rd Bridge Falsework Installation

#### Summary

As part of the I-5 North County Enhancements Project, Metro's contractor OHLA-USA, will be installing the falsework (temporary structures) to support construction of the new Weldon Canyon Rd bridge. This structure will span over the full width of the I-5 and the erection will involve full directional closures from SR-14 to Calgrove Bl on weeknights for the installation of steel or timber beams, girders, foundations, and shoring devices.

#### Schedule & Closure Information

- Northbound full directional closures between SR-14 and Calgrove Bl
  - **Primary detour and truck route:** Exit I-5 to northbound SR-14, continue to westbound Golden Valley Rd/Newhall Ranch Rd, proceed to the Newhall Ranch Rd I-5 on-ramps.
  - **Local access detour:** Exit I-5 to northbound SR-14, continue to westbound Newhall Av, right on Railroad Av, left on Lyons Av, proceed to the Lyons Av/Pico Canyon Rd I-5 on-ramps.
  - **Anticipated dates: 11/29 and 11/30, 10pm-4am**
- Southbound full directional closures between Calgrove Bl and SR-14
  - **Primary detour and truck route:** Exit I-5 to eastbound Newhall Ranch Rd/Golden Valley Rd, continue to southbound SR-14 off Golden Valley Rd, proceed to the SR-14/I-5 interchange.
  - **Local detour route:** Exit I-5 at Calgrove Bl, continue south on The Old Road, south on San Fernando Rd and Sepulveda Bl, proceed to I-5 southbound on-ramp.
  - **Anticipated dates: 12/1 and 12/5, 10pm-4am**

#### Essential Details

- Full closure hours are 10pm-4am. Mobilization and partial lane closures may start as early as 8pm and continue through 6am.
- Full closures involve one direction of the I-5 being closed, with traffic maintained in the opposite direction.
- Traffic management on City streets will be implemented to assist detour routes.
- Advanced warning signage and detour signage will be posted along the route.
- All lanes will reopen before peak traffic hours each morning.
- The speed limit within the project corridor is 55-miles per hour.
- Contingency dates: 12/6 – 12/8, 10pm-4am, if needed.

#### Noteworthy

**Construction is a dynamic process, and it is subject to weather conditions. Closure dates and information are subject to change.**

Visit the project website for the most up to date information and a weekly listing of ramp closures scheduled. Access for emergency responders will be maintained.
